SUMMARY

Full-stack software engineer shipping production systems in **C#/ASP.NET Core, React and Azure**. Sole developer of a 97-endpoint healthcare order platform serving 1,000+ users and 10–20K daily orders; lead developer of a module that replaced a paid Salesforce workflow; cut API latency 75% with Redis; migrated a data warehouse from Azure to AWS Snowflake with zero downtime; on-call DRI for a 4,000+ facility SaaS. Builds backend services in **Python** and **TypeScript** outside work, including a ~5,200-line retrieval platform on FAISS with cross-encoder reranking. **Patent holder** and 3× IEEE/Scopus-published.

EXPERIENCE

Gentell

Noida, India

Junior Application Developer (Lead Developer, Atlas/CMN)

Jul 2025 – Present

- Built and shipped **MyOrders**, a **97-endpoint** healthcare order-management platform (.NET, ASP.NET Core, React, SQL Server, Azure) as **sole developer** under a **2-week** deadline, serving **1,000+ users** across **7 branches** with Brightree EHR sync of **10–20K daily orders**.
- Architected a **28-endpoint RBAC admin system** with **30+ DTO schemas** (role and permission CRUD, bulk approvals, JWT auth) and integrated **CMS PECOS** physician records with NPI- and name-based search, replacing manual provider lookups with instant verification.
- Cut API latency **75%** (400 ms to 100 ms) with a **Redis** distributed cache on Azure App Service, and migrated the data warehouse from **Azure to AWS Snowflake** with no downtime to tracking pipelines.
- Led development of **Atlas**, a Certificate-of-Medical-Necessity module migrating a **Salesforce**-licensed workflow (**\$175/user/mo**) into the core Fastcare platform, with automated PDF generation, multi-signer DocuSign routing, and signed-document upload to Brightree DMS
- Authored **40+ Playwright and Cucumber BDD** test cases across Fastcare and MyOrders, cutting **2–3 hours of manual QA per release** via CI/CD-integrated regression on every deploy.
- Served as **on-call DRI** for production incidents on a **4,000+ facility** wound-care SaaS, monitoring Azure dashboards and resolving issues before they reached end users.

Homoeocare Pharma

Remote (Freelance)

Full-Stack Developer

Aug 2024 – Apr 2025

- Delivered an end-to-end e-commerce platform for an FDA-approved pharmaceutical brand as sole developer: **7 product categories**, **50+ SKUs**, Stripe checkout, a custom inventory backend, a doctor portal, and an appointment-booking module.

PROJECTS

HealthHubPro: Health Tracking Platform [Code]

TypeScript, Node.js, PostgreSQL, Redis, InfluxDB, Kubernetes

- Built a health-tracking platform exposing **26 REST endpoints** (Node, TypeScript, PostgreSQL with Drizzle) behind a **Redis** cache layer, with **InfluxDB** time-series storage for **6 biometric signals** and CSRF-protected JWT auth; deployed via **Kubernetes** manifests with **Prometheus, Grafana and Sentry** monitoring.

Document Intelligence Framework [Code]

Python, FAISS, Flask, Neo4j, LLMs

- Built a retrieval-augmented document platform as **~5,200 lines of Python services**: a **FAISS** vector store, an embedding service, a **cross-encoder reranking** stage over first-pass candidates, a knowledge-graph layer for entity relationships, and LLM answer synthesis, served through a **Flask** API.

On-Chain Verification Suite [Code]

Solidity, Hardhat, The Graph, Node.js, ethers.js

- Three linked components: a **Merkle-proof verifier** with off-chain tree generation and on-chain root verification, an **ECDSA signature verifier** that rejects malleable signatures per **EIP-2**, and a **USDC transfer tracker** indexing on-chain events through a subgraph and serving them via a cron-pollled Express API. Covered by Hardhat test suites.

GenAI Virtual Interview Coach with Lip-Sync Verification [Code]

Python, TensorFlow, OpenCV, LLMs, RAG

- Built a multimodal platform spanning **5 assessment modes** with **zero fixed question bank**; an LLM and RAG engine generates resume-aware questions and scores responses across **4 dimensions**, while DeepFace lip-sync verification flags passive test-taking at **92%+ accuracy**. **Patent filed** (inPASS 202541122226); accepted at **IEEE ICCCNT 2025**.

SKILLS

Languages	C#, Python, SQL, TypeScript, JavaScript, C++
Backend	.NET, ASP.NET Core, Web API, Node.js, Express, Flask, FastAPI, REST APIs, Microservices, JWT / RBAC auth
Frontend	React, Next.js, TypeScript, HTML/CSS, responsive UI
Cloud & DevOps	Azure (App Service, DevOps, Blob, Monitor), AWS, GCP, Docker, Kubernetes, CI/CD, Git
Databases	SQL Server, PostgreSQL, Redis, MongoDB, Neo4j, InfluxDB, Snowflake, Firebase
Testing & QA	Playwright, Cucumber (BDD), Jest, Cypress, E2E automation, regression pipelines
AI / ML	RAG, LLMs, FAISS vector search, TensorFlow, OpenCV, NLP, Generative AI
Integrations	Brightree (SOAP), DocuSign e-Signature, CMS PECOS, Stripe
Practices	System Design, Distributed Systems, Application Resiliency, Agile/Scrum, Code Review, Data Structures & Algorithms, OOP

EDUCATION

Vellore Institute of Technology (VIT), Vellore B.Tech, Computer Science • CGPA 8.54/10.0

Sep 2021 – May 2025

PUBLICATIONS & CERTIFICATIONS

Patent (2025): AI-Powered Interview Coaching with Multimodal Auth, *inPASS 202541122226* • **IEEE ICCCNT 2025** (Lip-Sync GenAI Interview Coaching)

• **INCONSYM 2025** (Multi-Face Detection) • **ICICT 2024** • **Certs**: AWS Cloud Practitioner (CLF-C02), Google Cloud Digital Leader.
